Reviewer A:

As the plagiarism report shows only 2% similarity index the article is accepted for publication. The article will be given full consideration for publication in our forthcoming issues.

After initial review, the following corrections are to be made in the manuscript

1. **REFERENCES.** Many references are incomplete. The references should be complete and follow Harvard referencing style (according to our Guidelines). All the references must be mentioned in the text also. All references mentioned in the text must be present in the reference list at the end. In the reference list there should not be any et al. All journal name must be mentioned in full.

Follow the below format mentioned:

A) Last name, First initial. (Year published). Article title. Journal, Volume (Issue), Page(s).

B) Website name. (Year published). Page title. Retrieved from: URL.

2. **Acknowledgement:** Add an acknowledgement section to the article. Author(s) must acknowledge and declare any sources of funding and potential conflicting interest. The section must include persons who provided technical help, writing assistance and departmental head that only provided general support. Financial and material support should also be acknowledged.

3. **CONCLUSION:** Conclusion is missing in Abstract section. The conclusion section in the main body is very short. Add a Conclusion section to summarize your thoughts, to demonstrate the importance of your ideas, and to propel your reader to new views on the subject.

4. **LANGUAGE:** Few sentences need to be reconstructed. Make them clearer and more meaningful. The article must be revised linguistically as there are many grammatical errors.

Recommendation: Revisions Required
